EDUCATION & TRAINING

Bachelor of Engineering in Geomatics Engineering, University of Benin

Expected Graduation

Specialized Training: Google Agentic AI Architecture (5-Day Intensive AI Agents Program), Kaggle Intro to Machine Learning, Kubernetes African Developers Training Program.

SKILLS/TECHNOLOGIES

Technical: Python, FastAPI, Django, Flask, SQLite, MySQL, JavaScript, HTML & CSS, Generative AI (RAG, OCR), Pandas, NumPy, Git & GitHub, Azure/Onrender Deployment.

Soft Skills: Technical Leadership, Agile Methodology, Cross-functional Communication, Time Management.

WORK EXPERIENCE

Backend Engineering Team Lead (Team 6) - Cowrywise

2026

- Engineered and shipped 3+ lightweight microservices and external API integrations using FastAPI, optimizing data retrieval and backend communication.
- Spearheaded a specialized cohort of developers in backend architecture, overseeing project deliverables, and resolving technical blockers to ensure consistent code output.
- Acted as the primary technical liaison, providing regular milestone updates and aligning technical execution with project goals.

Engineering Team Lead - Programmify Internship Program (PIP4)

2026

- Directed an engineering team through weekly challenges and intensive "Build Weeks," focusing on rapid prototyping, creative problem-solving, and collaborative development.
- Enforced agile methodologies and consistent team communication across platforms, ensuring high active engagement and reducing unresponsiveness.
- Mentored team members on best practices for original code creation and responsible AI integration.

Lead Developer - CoinFlux Ltd

Mar 2025 – Present

- Led the development of a finance tracker, implementing authentication and data analytics modules; enhanced user data insights and security.
- Equipped system with an AI chatbot for personalized financial recommendations.
- Eliminated server latency problems, speeding up load times by 30%, and made the system fully responsive and accessible across all devices through a successful deployment lifecycle.

Python Developer & Data Analyst - Yomi Denzel Foundation

Aug 2024 – Feb 2025

- Contributed to multiple projects from simple calculators to predictive machine learning, transforming creative ideas into scalable systems.
- Assisted peers in debugging and reviewing code, fostering team productivity and knowledge sharing, increasing efficiency by 40%.
- Cleaned, standardized, and analyzed large datasets using Pandas and NumPy, automating key data processes to save analysis time and reduce manual errors by 60%.

PROJECTS

DocuAIMind - AI-Powered Document Intelligence Platform | [Link](#)

- Engineered a secure, client-side authenticated chatbot utilizing dynamic API key validation (BYOK architecture).
- Integrated advanced document parsing and retrieval pipelines (RAG) to enable seamless file uploads, OCR scanning, and context-aware chat, directly leveraging Google AI/OpenAI architectures.

Giscopo - Automated Exam Report Application | [Link](#)

- Architected and deployed a monetized web application using Python, Django, and FastAPI to generate personalized academic reports.
- Managed end-to-end development from database design to production hosting on Onrender, successfully generating 42,000 NGN in revenue upon launch.

Fincom - Finance Tracking System | [Link](#)

- Engineered an AI-driven platform with secure backend routing.
- Designed for accessibility, allowing users to efficiently manage financial data and generate AI-assisted recommendations.

LEADERSHIP, ACHIEVEMENTS & EXTRACURRICULAR

Alumni - Aspire Leaders Program (Harvard Collaboration Cohort)

2026

- Successfully completed a highly selective global leadership program, engaging with global peers and Harvard faculty on advanced leadership frameworks.

Campus Director - Hult Prize, University of Benin

Jan 2026 – Apr 2026

- Directed campus-wide innovation initiatives and managed the organizing committee to foster social entrepreneurship.
- Organized high-profile technical and pitch sessions, mediating between stakeholders and mentors.
- Award:** Received the Young Impact Leader Award at the Hult Prize Nationals (May 2026).

Lead - Departmental Python Programming Initiative

Present

- Leading the technical capacity building of the Geomatics Engineering class, designing curriculum and equipping peers with foundational and advanced Python skills.
- **Campus Involvements:** Microsoft Learn Student Ambassador (Community Influencer Track), Tech-Wave Campus, The Hive Network Africa, GitHub Developer Community, Google Developers Group on Campus, Former Vice-President of the Young Innovator's Club.
