

Prosper Ossaiku

Full-Stack Developer

+2348140878766 ◇ prosperossaiku@gmail.com ◇ Lagos, Nigeria ◇ [LinkedIn](#) ◇ [Portfolio](#)

SUMMARY

Innovative and calm developer with a strong focus on Python and Flask, passionate about turning witty ideas into scalable, impactful solutions. Skilled in building secure backend systems, optimizing performance, and transforming data into clear insights using Pandas and SQL. Known for delivering clean, efficient code and collaborating effectively with teams and stakeholders to create high-quality, user-focused products. Dedicated to continuous learning and always coding with purpose.

EXPERIENCE

Python Developer

Aug '24 — Feb '25

Yomi Denzel Foundation

Contributed to multiple projects from simple calculators to mini games to predictive machine learning, transforming creative ideas into scalable systems. Assisted peers in debugging and reviewing code, fostering team productivity and knowledge sharing increasing efficiency by 40%.

- Diverse Project Development: Built a variety of Python-based applications, from simple utilities to advanced data analysis tools.

Lead Developer

Mar '25 — Present

Coinflux Ltd

Led the development of a finance tracker, implementing authentication and data analytics modules; enhanced user data insights and security. Equipped with an AI chatbot for personalized financial recommendations.

- Performance Optimization: Sped up load time by 30% eliminating problems of a sleeping server.
- Accessibility: Made the system fully responsive and accessible across all devices, delivering a smooth, visually impressive, and user-friendly experience.
- Followed up full deployment process till success.

Python Data Analyst

Oct '24 — Feb '25

Yomi Denzel Foundation

Supported data-driven decision-making and backend data workflows where large datasets were cleaned and standardized using pandas and numpy, with automated processes, saving analysis time and reducing manual errors. Also built visual dashboards in Tableau and analysis with matplotlib, providing actionable insights.

- Cleaned, standardized, and analyzed large datasets using **Pandas** and **NumPy**, automating key data processes to save analysis time and reduce manual errors by 60%.

Data Analyst

Oct '24 — Nov '24

Idealnovate Africa

During my time at Idealnovate Africa, I was able to learn the use of applications like Excel, PowerBI etc. for analytics purposes where we also worked on some projects to test our knowledge.

- Designed charts and graphs to interpret data, aiding easy understanding with a boost of 60%.
- Separated data into bins and standardized the data, improving readability by 20%.

Frontend-Developer

May '25

PaddiCode

Got experience from industry experts, learnt the criteria, and harnessed my skills as a front-end developer.

EDUCATION

Bachelor of Sciences in Computer Science, University of Benin

Feb '25-Present

- Member, Tech-Wave Campus
- Microsoft Student Developer Community
- Microsoft Learn Student Ambassador
- Member Github Developer Community

Senior School Certificate in Sciences. Hansy Private School.

Sep '21-Jul '25

- Vice President of Young Innovators Club
- 2x Quiz Winner

PROJECTS

Fincom – A Finance Tracking System. [Link](#)

- **AI-Powered Assistance:** Developed an intelligent chatbot for real-time financial recommendations.
- **Convenience & Accessibility:** Designed the platform for easy usability, allowing users to set up websites from the comfort of their homes.

Personal Portfolio Website. [Link](#)

- Developed a responsive, modern personal portfolio to showcase skills, projects, and experience. Built with HTML and CSS, featuring animations, smooth scroll effects, and an elegant design to reflect creativity and technical skills.

Banking – A Simple Bank App. [Link](#)

- Collaborated with a team to design a simple bank app with real-time virtual transaction feature and security.

SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS, Flask, MySQL

Tools: VS Code, Jupyter, Canva, Github, Excel, PowerBI

Concepts: Backend architecture, web development, authentication, performance optimization, data analysis, collaboration, data science, software development
